Bicycles with extra-wide tires can be parked comfortably and safely in the Stand Parker 4000 BR. Bikes with tyre widths of up to 64 mm and 29-inch wheels park here protected against toppling over in the exceptionally high parking hoops to which bicycle locks can also be attached. Valuable space is saved through height-offset parking or, if desired, double-sided access. Simply unpack and assemble according to the instructions provided. Ground anchors and mounting brackets are available as accessories.
